

## **Senior Structural Engineer**

**Reading, Berkshire**

**Hybrid working - 3 days per week**

**£45,000 - £55,000**

Are you a Structural Engineer or Senior Structural Engineer looking to work on a wide variety of projects up to £1 billion in construction value?

Does working with a highly reputable engineering consultancy with consistent repeat business providing clear job security interest you?

*We are currently working with this exact business!*

**Having recently moved offices to Reading due to a successful pipeline, this engineering consultancy is looking for a Senior Structural Engineer to:**

- Design for large, multi-storey reinforced concrete (RC) schemes in London.
- Work on housing and apartment developments using a variety of materials, including load-bearing masonry, steel frames, and RC transfer decks.
- Handle building conversions of RC frames and load-bearing masonry.
- Contribute to refurbishment projects, primarily on large historic properties.

### **What They Are Looking For In The Successful Senior Structural Engineer**

- A (Senior) Structural Engineer with a minimum of 3 years of UK experience.
- Proven proficiency in designing with reinforced concrete, steel, masonry, and timber.
- A proactive, ambitious individual with a strong commitment to meeting project deadlines.
- Excellent written and verbal communication skills
- Familiarity with proprietary products related to your designs.

### **Package**

- £40,000 - £50,000
- Private healthcare
- Company pension
- Annual bonus scheme
- Active support towards chartership through both the IStructE and ICE
