

Senior Civil Engineer

London & Gloucester

Are you a Senior Civil Engineer with strong project and client management skills looking for an opportunity to progress to a Principal role?

Do you want to be a key part of a senior management team and work on a diverse range of infrastructure projects?

We are currently working with this exact business!

This reputable engineering consultancy is seeking a Senior Civil Engineer to join their team, with positions available in both London and Gloucester. The successful candidate will be a key part of the senior management team and have the opportunity to progress to a Principal role. You will manage and lead a team, liaise with clients, and take a positive, creative approach to problem solving.

The Successful Senior Civil Engineer Will Have:

- A relevant degree and over 5 years of civil engineering experience.
- Strong project and client management skills, along with effective communication.
- Expertise in writing reports such as Flood Risk Assessments and Drainage Statements.
- Proficiency with software including Causeway Flow and Site 3D.
- Someone with a positive, creative approach to problem solving who is eager to take on a leadership role.

Package

- A competitive salary.
- A discretionary bonus structure
- 25 days of holiday, with options to buy or sell additional days.
- Assistance with professional development.
- Company pension, life assurance, and Medicash.
- Enhanced maternity and paternity benefits.
- An Employee Assistance Programme.
- Life assurance of 4x annual salary
