

Principal Structural Engineer

Kent

Are you a Principal Structural Engineer with a passion for leading projects and mentoring junior team members?

Does working for one of the UK's top engineering consultancies, providing integrated solutions for a diverse range of clients, interest you?

We are currently working with a business just like this looking for a future leader to join their team!

This leading consultancy is seeking an experienced Principal Structural Engineer to join their Kent office. The ideal candidate will serve as the technical lead on a variety of projects, such as healthcare, education and residential. You will be responsible for leading the design team to ensure coordinated solutions that meet client requirements.

What They Are Looking For In The Successful Principal Structural Engineer

- A Principal Structural Engineer who is Chartered (MICE or MStructE).
- Proven experience as a technical lead on projects and a history of leading design teams.
- A professional with strong experience in structural assessment of new and existing properties in steel, concrete, masonry, and timber.
- The ability to perform analysis and design using Tekla Structural Designer.
- Excellent report writing, communication, and numerical skills.

Package

- A competitive salary, based on experience
- Contributory pension, personal healthcare plan, and life insurance.
- 33 days of annual leave (inclusive of Public Holidays).
- Annual leave purchase and buy-back scheme.
- Bonus schemes, including a loyalty bonus and a qualifications award.
- Support for professional development, including reimbursement of professional fees.
- An interest-free travel loan scheme.
