

BREEAM Consultant

Home Based - 4 Days Per Week (1 Day in Office)

£40,000 - £60,000

*Are you an ambitious sustainability professional looking for the ultimate work life balance?*

We are working with a start up, rapidly expanding sustainability specialist consultancy who are looking for a BREEAM Consultant to join their incredible team on a full time basis. This role is uniquely structured to offer 4 days per week working from home, providing the autonomy to manage your own projects while remaining part of a growing consultancy. This is the perfect move for a technical expert who thrives on independent project management and is looking for a flexible, modern working environment.

**The BREEAM Consultant will:**

- Manage the full BREEAM assessment process for a diverse portfolio of new construction and refurbishment projects.
- Provide expert advice to design teams and contractors to ensure sustainability targets are met.
- Collate and review technical documentation to ensure all credits are robustly supported for BRE submission.
- Assist clients in developing overarching sustainability strategies.
- Produce high quality pre-assessment reports and final certification filings.
- Work closely with multidisciplinary teams to ensure a seamless flow of information across the project lifecycle.

**We are looking for a BREEAM Consultant with:**

- Proven experience in a sustainability consultancy role with a focus on BREEAM assessments.
- Licensed BREEAM New Construction (NC) Assessor status (highly desirable).
- A strong understanding of the UK planning system and evolving building regulations.
- Excellent report-writing skills and the confidence to lead client-facing meetings.

**The Package**

- Hybrid working: 4 days per week working from home, 1 day in the office.
- Full coverage of professional membership fees.
- Support for further specialist certifications and professional development.
- Generous holiday allowance.
- Contributory pension scheme.
- A clear roadmap for advancement within a growing, specialist consultancy.

If you are interested, please apply today and one of the teams from One Generation will get back to you shortly!
